Summary

Graduated from the Department of Information Systems, I am highly motivated with a deep passion for programming and web development. Committed to continuous learning, I leverage my programming skills to create innovative solutions, enhance user experiences, and contribute to technological advancements.

Experience

IT Support, ACT College, Nabatiye

April 2021 - November 2022

A role in data collection, storage and management. Working on resolving technical issues inside the institution.

IT Support Specialist, Lancaster Plaza (Internship), Beirut

June 2023 - September 2023

During my internship, I served as an IT support Intern, where I gained hands-on experience in managing and troubleshooting networks and servers. I focused on ensuring the smooth operation of these systems, addressing any issues promptly and effectively. Additionally, I worked with data management, ensuring the integrity, security and efficient handling of data.

Web Developer, Hyve online (Internship)

September 2023 - February 2024

During my internship, I was immersed in the field of Web Development. I was involved in the design, development, and maintenance of websites, focusing on both the aesthetic and functional aspects.

Personal Projects
